

LABORATORY OBSERVATION/RECORD

Course: Full Stack Web Development

Course Code: 23CM4121

Experiment No.: 1

Student Name: Ch.Gouri Sai Sree

Roll No.: A24126552076

Date: 25-08-2026

1. TITLE

Develop a College Information Portal Webpage Using HTML5

2. AIM

To develop a mini web application using HTML that accepts student information through an HTML form and displays the submitted details.

3. OBJECTIVE

The objectives of this experiment are:

- To understand the basic structure and elements of HTML5.
 - To create a well-structured college information webpage using HTML.
 - To apply text formatting, lists, hyperlinks, tables, and images.
 - To design a student registration form using HTML form elements.
 - To use HTML5 semantic elements for organizing webpage content.
 - To implement multimedia elements such as audio and video.
 - To use modern HTML5 input types such as email, date, number, color, and range.
-

4. THEORY

HTML (HyperText Markup Language) is the standard markup language used to create and structure web pages.

HTML5 is the latest version of HTML that provides semantic elements, multimedia support, forms, and modern input types.

In this application:

- HTML5 document structure is used to organize the webpage.
- Headings and paragraphs are used to display college information.
- Lists are used to display courses and facilities.
- Tables are used to display student details.
- Images are inserted using the `<img>` tag.
- Forms are used to collect student registration details.
- Semantic elements such as `<header>`, `<nav>`, `<section>`, `<article>`, and `<footer>` provide meaningful page structure.
- Audio and video are embedded using `<audio>` and `<video>`.
- HTML5 input types such as email, date, number, color, and range provide specialized form controls.

The basic structure of the webpage is:

HTML5 Document → Header → Navigation → Content Sections → Forms → Multimedia → Footer

5. ALGORITHM / PROCEDURE

1. Create a valid HTML5 document using `<!DOCTYPE html>`.
 2. Add the page title and college information using headings and paragraphs.
 3. Apply text formatting and create ordered and unordered lists.
 4. Add hyperlinks to the college website and Google.
 5. Insert the college logo and campus image with appropriate alternate text.
 6. Create a student details table with Roll No, Name, Branch, and Email.
 7. Design a student registration form with text, email, password, radio buttons, checkboxes, dropdown, textarea, and submit/reset controls.
 8. Add semantic HTML5 elements such as `<header>`, `<nav>`, `<section>`, `<article>`, and `<footer>`.
 9. Add HTML5 input types such as date, number, color, and range.
 10. Embed audio and video using the `<audio>` and `<video>` elements.
 11. Save the file with an `.html` extension and open it in a web browser.
 12. Verify that all links, images, form controls, and multimedia elements work correctly.
-

6. PROGRAM

`index.html`

```
<!DOCTYPE html>
<html lang="en">

7. CODE EXPLANATION

Code	Explanation
<code><!DOCTYPE html></code>	Declares that the document uses HTML5.
<code><html lang="en"></code>	Defines the root of the HTML document and specifies English as the language.
<code><head></code>	Contains metadata and the page title.
<code><title></code>	Sets the title displayed in the browser tab.
<code><header></code>	Defines the header section of the webpage.

<code><nav></code>	Contains navigation links to different sections of the page.
<code><section></code>	Groups related content into meaningful sections.
<code><article></code>	Represents independent college information content.
<code><h1>, <h2></code>	Define main and subheadings.
<code><p></code>	Defines paragraphs of text.
<code>, <i>, <u></code>	Apply bold, italic, and underline formatting.
<code><sup>, <sub></code>	Display superscript and subscript text.
<code></code>	Creates an ordered list.
<code></code>	Creates an unordered list.
<code></code>	Creates hyperlinks to external websites or page sections.
<code></code>	

	Displays images using the specified source and alternate text.
<code><table></code>	Creates the student details table.
<code><tr></code>	Defines a table row.
<code><th></code>	Defines a table heading.
<code><td></code>	Defines table data/cell content.
<code><form></code>	Creates the student registration form.
<code><input></code>	Creates different form controls such as text, email, password, radio, checkbox, date, number, color, and range.
<code><select> / <option></code>	Creates a dropdown list for selecting a branch.
<code><textarea></code>	Provides a multi-line area for entering comments.
<code><audio controls></code>	Embeds an audio file with playback controls.
<code><video controls></code>	Embeds a video file with playback controls.
<code><footer></code>	Defines the footer section of the webpage.

About Us

ANITS is a private autonomous engineering college established in 2001. It is permanently affiliated to Andhra University, approved by AICTE and accredited with *NAAC 'A' Grade*. The college offers ^{UG} and ^{PG} programs with excellent infrastructure and placement opportunities. Visit the [Official ANITS Website](#).

Admissions

Admissions are based on **AP EAMCET** and **JEE Main** examinations. More details are available on the [Admissions Page](#).

Academics

The college provides quality education with experienced faculty, modern laboratories, workshops, seminars, and project-based learning.

Departments

Engineering Branches

1. Computer Science and Engineering
2. Artificial Intelligence
3. Electronics and Communication Engineering
4. Electrical and Electronics Engineering
5. Mechanical Engineering

College Facilities

- Library
- Computer Labs
- Sports Complex
- Hostel

Placements

The screenshot shows a web browser window with the address bar displaying "127.0.0.1:5500/college_information_portal.html". The page contains a registration form with the following fields and controls:

- Email:** A text input field.
- Password:** A text input field.
- Gender:** Radio buttons for "Male" and "Female".
- Hobbies:** Checkboxes for "Reading", "Coding", and "Sports".
- Branch:** A dropdown menu labeled "Select Branch".
- Date of Birth:** A date picker showing "dd-mm-yyyy".
- Semester:** A text input field.
- Favourite Color:** A color selection box currently showing black.
- Satisfaction Level:** A horizontal slider bar.
- Comments:** A large text area for user feedback.
- Submit/Reset:** Two buttons at the bottom of the form.

Below the form, the heading "College Location" is visible.

The screenshot shows the content area of the College Information Portal, featuring three main sections:

- College Location:** A Google Map showing the college's location in Sivasaikthi Nagar, Kothapalem. Landmarks include Divya Lakshmi Agency HP Gas, Ayodhya Nagar, and The Globe School. A "Quarry ground (marikavalat)" is also marked. An "Open in Maps" link is provided.
- College Anthem:** A section with a video player showing a duration of 0:00 / 0:00.
- Campus Tour:** A section with a video player showing a duration of 0:00.

9. RESULT

Thus, a College Information Portal was successfully developed using HTML5. The webpage implements structured content, tables, images, forms, semantic elements, multimedia, and modern HTML5 input types, and was successfully verified in a web browser
